

ISOLOFOAM: A WELL THOUGHT-OUT PRODUCT LINE

By having Pro Dealers partners that have builders and contractors in mind, ISOLOFOAM developed and manufactures a complete line of value-added expanded polystyrene insulation products to make installation faster and easier, at a competitive price. Who would say no to better margin, better quality and labor savings?

Value-added Products

ISOLOFOAM has the right product for every building application. Each and everyone of them is meant to enhance your customers/ homebuilder/ general contractor appreciation of our value-added insulation product line.

ISOLOFOAM Products

Trying and choosing ISOLOFOAM products is a sound decision:

- High-quality value-added products.
- Tested and proven.
- Several products have different edges, which decrease the risk of water infiltration in above-grade application.
- Underslab products come with clipping systems, meaning that the panels remain together during installation and provide continuous insulation.
- Fast to install.
- 2 steps in 1 products.
- Highly customizable: easy to get custom orders.
- Durable : Available in compressive strengths up to 60 psi.
- Meet the needs of professionals.
- ISOLOFOAM product line does not contain HBCD fire retardant and is Greenguard and Greenguard Gold certified.

Polystyrene Board: Expanded (EPS) vs Extruded (XPS)

Raw material- Expanded and extruded are made of the same raw material. Different manufacturing processes. Frequently considered by architects and engineers as an equivalent.

LTRR- Expanded polystyrene's thermal resistance is stable in time. Thermal resistance (LTRR) of extruded decreases as the blowing agent contained in the product evaporates over time. Building designs should consider LTRR value.

Water absorption- Expanded polystyrene absorbs a relatively small % of water, although superior to extruded. However, EPS has a good drying potential.

High density: Expanded polystyrene product densities range between 10 psi to 60 psi.

R Value/ Price Ratio: Great savings for your projects.
